

THE BSI CHRONIC DISEASE REGISTRY

Fits All Shapes and Sizes...

- Paper practices
- Small practices with EMR or billing systems
- Large practices with fully-automated systems

Give A Little - Get A Lot...

- Minimal disruption of a practice's Microsystems
- Maximum level of reporting to provide practitioners with necessary tools to improve care to diabetics

Open Communication...

- Fully integrates with **BeSocial**, our closed social network application
- EMR and billing systems can be easily integrated

Ends Justify the Means...

- 27 diabetes-related reports with over 125 customizable options
- Monthly analysis reports
- Quarterly comparative reports
- Includes cardiovascular disease and hypertension modules

The Future Is Wide Open...

- Scalable and easily expandable to include other chronic diseases

For the Patients...

- Improved glycemic control and avoidance of complications in patients with diabetes
- Improved blood pressure control
- Increased patient self-management and satisfaction

For the Practice...

- Develop a proactive approach to care of diabetes
- Reorganize the practice system to better meet patient needs
- Understand the value of clinical information systems in chronic care
- Make progress in meeting other quality-based accreditation standards as required by organization ("Meaningful Use", Payer quality incentives, NCQA Accreditation)
- Increase job satisfaction among staff

Proven Success...

- Used in a rural environment to improve the health of diabetic patients where care and education lacks the most
- Want more proof? The table below shows improvements made between 2007 and 2009 for 1,000 diabetic patients within ONE community using the BSI Chronic Disease Registry
