

BSI MEDICAL HOME SOFTWARE ...

What's The Difference?

- Patients can enter and track their own health data on their schedule.
- Data collected creates a comprehensive, real-time patient profile.
- Pain management, advance directives, chronic conditions, and medication tracking.
- Observations feature allows patients to enter free-form notes.
- Patients control provider access for viewing and updating of their data.
- Direct, secure communication between patients and providers.
- Communication and information sharing between providers.
- Paper profile for data sharing within non-participating providers.
- Provider and organizational-level generation of custom patient surveys and results reporting.
- Sophisticated chronic-disease outcome measurement tools.

Benefits Everyone By...

- Integrating quality improvement and data collection methods into practices.
- Increasing efficiency and satisfaction for both patients and the health care team.
- Incorporating population-based strategies for patient management.
- Developing and applying strategies to expand and sustain improvements to care.
- Elevating the quality of healthcare by giving patients the tools to be more proactive and involved in their medical care.
- Utilizing the “patient centric medical home” model as a concept of care delivery, which includes an ongoing relationship between a provider and patient - a comprehensive approach to care and coordination of care through multiple providers and community services.
- Enlisting Primary Care Physician's (PCP) to help patients get the specialty care that they need when they need it most.
- Allowing patients to keep careful track of their treatments and inform specialists of their treatment progress.
- Offering the flexibility to be used at different levels, including patient, provider, organization, and hospital.
- Operating on a secure site that meets strict HIPAA-compliance standards.

For Patients...

- Patients can directly update their medical information, including standard items like vitals and lab tests, and more detailed items like self-management goals, preventive health tests, advance directives, participation in surveys, and more.
- Patients can select specific medical information for sharing with approved providers.
- Patients can use in the built-in instant messaging system to communicate directly with approved providers and hospitals as needed.
- Patients improve their involvement and communication with providers which will improve the patient's overall wellness and insure they get the best care possible.

BUTTON SYSTEMS, INC.

COMPLETE SYSTEMS FOR COMPLETE CARE

For Providers...
